

Aluminium Sliding Patio Door

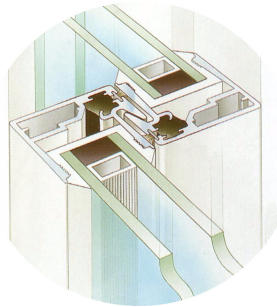

A great space saving alternative to French doors, these aluminium door can be fitted as either two, three or four pane doors as standard. Non-standard doors may be available a member of our team would be able to check these details with you.

Although its stylish minimal lines give a modern look there has been no compromise on security . It also comes with an integral trickle ventilation allowing compliance with building regulations if necessary.

SAFETY & SECURITY

When fully closed the sliding pane interlocks with the fixed pane, which prevents the doors from being levered apart.

Within the head of the frame is an anti-lift block which prevents the doors from being lifted out of the frames.

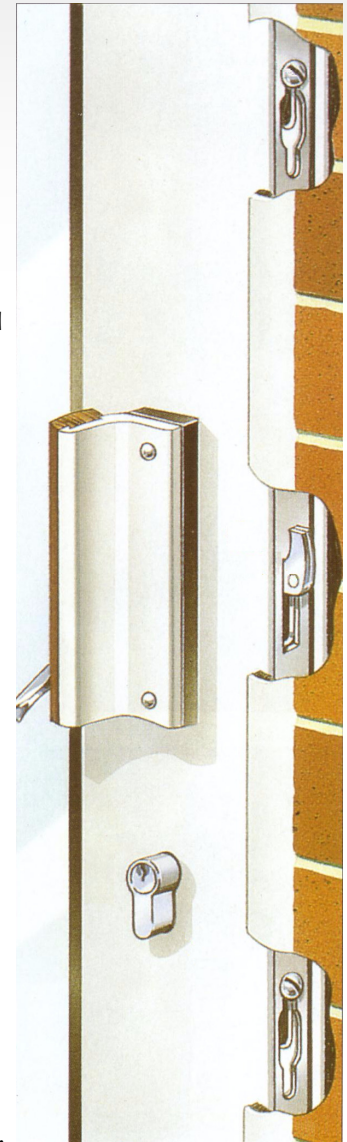

You can also have the door fitted with a shoot bolt which allows the door to be locked in an open position allowing you to ventilate the room with the peace of mind that small children and pets will be safe in side your home.

Four locking bolts locate behind keeps made of heavy grade stainless steel which prevents the door being forced away from the frames.

MAINTENANCE
Thorough cleaning and light lubrication of working parts is recommended twice yearly using Vaseline, silicone or acid free oil. Mild soap solution can be used to wash products generally to maintain the finished appearance.

BUILDING REGULATORY COMPLIANCE
All of our products where required are fitted with double glazed units incorporating a low emissivity treatment in accordance with the current government regulations regarding heat loss in your home. As governed by FENSA.

As well as installing quality products in the local areas we are also a specialist designer and supplier of aluminium door, window and conservatory systems for the building industry.
